

# Fiverr OughtWe - Information Specifications

## What is Fiverr OughtWe?

Fiverr 'OughtWe' is an offering by John Salter in which he uses his 'OughtWe' app **to develop and record your decision.**

Please provide the following three pieces of information:

1. **Your decision** - described in one sentence. (Example - should I stay or should I go?)
2. **Your context** - a few sentences expanding on the description of your decision. (Example - I am working overseas on a good salary and enjoy my work - but I want to be able to get home to see my family. This is very difficult in pandemic times.)
3. **Your Criteria** You can populated your OughtWe report with up to nine (9) specified decision criteria.

**Specifics of each criterion** For each of the specified criteria you require in your report, please provide us with:

- Criteria Name** (Text) - example "Result".
- Criteria Description** (Text) - example "To what extent does this option achieve the required result, goal, or objective?".
- Criteria Weightings** - your agreed default settings (from minus nine to plus nine).

## The Five Criteria we recommend

You may use the five criteria shown in the image below as your default set.

**Please advise any adjustments needed to their description and weightings.** See [YourOughtWe decision making app - example - John Salter Consulting Services](https://disasterresilience.consulting/youroughtwe-decision-making-app-example/)<https://disasterresilience.consulting/youroughtwe-decision-making-app-example/>

## Criteria & Weight

-ve+ve

To what extent does this option achieve the required result, goal, or objective?

**Administration**
+4

-ve+ve

To what extent can this option be readily implemented?

**Leverage**
+1

-ve+ve

To what extent does this option fit well with other policies and approaches?

**Risk**
-2

-ve+ve

To what extent will the implementation of this option create new risks?

**Cost**
-6

-ve+ve

Will the implementation of this option be low cost, medium cost, or high cost?

**The Fifteen Criteria you might consider**

The full list of criteria from which you may select up to nine - or use for your consideration to generate your own criteria - are at Page 51/68 of <https://disasterresilience.consulting/wp-content/uploads/2021/05/manual-05.pdf>

Criteria	Questions
Cost	Is this option affordable? Is it the most cost-effective?
Timing	Will the beneficial effects of this option be quickly realised?
Leverage	Will the application of this option lead to further risk-reducing actions by others?
Administrative efficiency	Can this option be easily administered or will its application be neglected because of difficulty of administration or lack of expertise?
Continuity of effects	Will the effects of the application of this option be continuous or merely short-term?
Compatibility	How compatible is this option with others that may be adopted?
Jurisdictional authority	Does this level of government have the legislated authority to apply this option? If not, can higher levels be encouraged to do so?
Effects on the economy	What will be the economic impacts of this option?
Effects on the environment	What will be the environmental impacts of this option?
Risk creation	Will this option itself introduce new risks?
Equity	Do those responsible for creating the risk pay for it's reduction? When the risk is not man-made, is the cost fairly distributed?
Risk reduction potential	What proportion of the losses due to this risk will this option prevent?
Political acceptability	Is this option likely to be endorsed by the relevant governments?
Public and pressure group reaction	Are there likely to be adverse reactions to implementation of this option?
Individual freedom	Does this option deny basic rights?
